

Metaplan in Life Sciences

Our essence

Leveraging assets across the lifecycle

Supporting organizations thrive

Structures and Strategies

What is the best organizational design to achieve our ambitions?

e.g.

A pharmaceutical company in an early stage of the product's life cycle needs to design a go-to-market strategy for a new therapeutic area.

How can you get the same shared orientation in an organization?

e.g.

A crossfunctional clinical development team needs to develop a robust portfolio strategy based on global and regional perspectives.

What are the organizational implications of digitalization?

e.g.

A pharmaceutical company needs to decode why a digital transformation project has failed and wants to understand which organizational levers could improve the situation.

How can you manage an alliance between two companies?

e.g.

Two pharmaceutical companies want to leverage the resources from both sides to create synergies in their ways of working and collaboration.

Supporting members in organizations

Competence Development

How do we provide our leaders with the right resources to take the lead?

e.g.

Organizational leadership programs

How can you structure dialogues and design and moderate workshops?

e.g.

Metaplan moderation program

How do we develop our talents to navigate in our organization?

e.g.

Trainee program for young professionals

What are the hot topics our organization is facing?

e.g.

Peer learning on agility, innovation, and many more management topics
